## SKILLS

HTML5/CSS | JavaScript | jQuery

Node.js | Express | AngularJs

MongoDB | Mongoose | Ruby

Rails | PostgreSQL | SASS | OOP

---

## RELEVANT EXPERIENCE

### General Assembly Web Development Immersive

March 2017 - June 2017

**Rivetr** - HTML, CSS/SASS, JavaScript, AngularJS, Ruby on Rails, PostgreSQL, Node.js, Express  
Rivetr is a twitter clone but tailored for language learners. Find users that are learning the same language you are or are native speakers, follow them, reply to their posts, and share your own posts all in the language you're trying to learn. I built the front-end using AngularJS to make AJAX requests to the backend API that I built using Ruby on Rails and a PostgreSQL database.

**Stocker** - HTML, CSS/SASS, JavaScript, AngularJS, Ruby on Rails, PostgreSQL, Node.js, Express  
Stocker is a stock market simulator that uses real stock data taken from a stockquote Ruby gem. It allows users to create an account that will give them \$10,000 to play with, then generates a portfolio to keep track of the stocks they buy or watch. Stocker was built with a group and uses an AngularJS and Express front-end, and a Ruby on Rails with PostgreSQL backend.

**Bitefinder** - HTML, CSS, JavaScript, AngularJS, MongoDB, Mongoose, Node.js, Express  
Bitefinder is a MEAN stack, single-page CRUD app powered by an external Zomato API. It lets users find restaurants based on the user's location, or on any city they search and allows them to pin locations and restaurants, and leave personal notes about them. This app was built with a group utilizing AngularJS to power the front-end, and MongoDB to power the back-end.

**Mixtapes** - HTML, CSS, JavaScript, MongoDB, Mongoose, Node.js, Express  
Mixtapes is a full-stack, sessions-based, four model CRUD app built with MVC file organization. It's an application that lets users create music playlists using YouTube video links and discover music by listening to other user's playlists.

## **WORK EXPERIENCE**

### **Waba Grill Temecula Pkwy**

Customer Service Representative

April 2016 - January 2017

Worked front-of-the-house with a small team to ensure quality customer service and orders in a fast-paced environment. Built loyal clientele by establishing good rapport with customers. Quickly learned how to master the point-of-sale system despite never working with one before.

## **EDUCATION**

### **General Assembly**

Web Development Immersive

March 2017 - June 2017

### **University of California Irvine**

Courses in Chemistry

September 2012 - December 2016
